The Official Opening of the Carol Picart Courtyard at Victoria Jubilee Hospital

The Carol Picart Courtyard at the Victoria Jubilee Hospital (VJH) provides a peaceful space for healthcare workers to rest, reflect and recharge amid the demands of one of Jamaica's busiest maternity hospitals.

Developed under the Ministry of Health and Wellness' Compassionate Care Programme and funded by the Mia'Sarka Foundation, the courtyard features landscaped gardens, outdoor seating, indoor lounges, artwork and quiet areas designed to promote relaxation, mental wellness and rejuvenation.

At the official opening on Wednesday, June 10, 2026, Dr. the Hon. Christopher Tufton, Minister of Health and Wellness, welcomed the facility and described it as a model that could become standard across Jamaica's healthcare system. He emphasised that the well-being of healthcare workers is directly connected to the quality of patient care, noting that hospitals should create environments that support emotional well-being in addition to providing clinical care.

The courtyard honours Mrs. Carol Picart, a Jamaican-born, UK-based philanthropist whose Mia'Sarka Foundation has contributed more than $50 million towards medical equipment, infrastructure improvements and training programmes in Jamaica. Her humanitarian work also extends to maternal healthcare initiatives in Kenya and Uganda
.
Mrs. Picart explained that the courtyard was created as a "little oasis" where healthcare workers can escape the pressures of their demanding roles and re-energise. She also outlined plans for further initiatives supporting maternal and neonatal care, mobile outreach clinics, education, healthcare careers and mental health.

The courtyard ultimately represents a commitment to compassionate care for both patients and caregivers, recognising that those who dedicate themselves to caring for others also need spaces to rest, recharge and feel supported.

Highlights of Trade Winds Citrus Limited Tru-Juice 5k

Several members of staff from Linstead Hospital and Spanish Town Hospital participated in the 11th staging of the Trade Winds Citrus Limited Tru-Juice 5K Run/Walk, held on Sunday, June 7, 2026, in support of a worthy cause while promoting the importance of health, wellness and an active lifestyle. Their participation also reflected the hospital's continued commitment to community engagement beyond the walls of the facility.

This year's event carried added significance for Linstead Hospital, as proceeds will support the purchase of much-needed equipment for the hospital, helping to strengthen its capacity to deliver quality healthcare to patients.

See pictorial highlights below:

8 Open-Heart Cardiac Surgeries Performed at Bustamante Hospital for Children

Between June 8 and 15, 2026, eight Jamaican children with complex heart conditions received lifesaving open-heart surgeries at the Bustamante Hospital for Children through a collaborative cardiac surgery mission involving Chain of Hope UK, Gift of Life International and local healthcare teams.

The children, many of whom had challenges with everyday activities, were given an opportunity for improved health and quality of life through access to specialised cardiac care.

The mission also marked 30 years of cardiac surgery missions to Jamaica by renowned surgeons Professor Victor Tsang and Professor Magdi Yacoub, who first visited the island in 1996 to provide free cardiac interventions for children.

The latest mission brought together an international team of cardiac surgeons, cardiologists, anaesthetists, nurses, intensivists, perfusionists and other specialists, who worked alongside Jamaican healthcare professionals. Beyond the surgeries, the visiting team provided hands-on training and knowledge exchange, strengthening local expertise and paediatric cardiac services.

Mr. Anthony Wood, CEO of the Bustamante Hospital for Children, expressed appreciation to the international partners, noting that the collaboration not only transforms children's lives but also strengthens Jamaica's capacity to provide advanced cardiac care.

Victoria Jubilee Hospital Receives Ultrasound and CTG Machines

Hon. Krystal Lee (second right), State Minister, Ministry of Health & Wellness, converses with stakeholders during the official handover ceremony of the 13 Cardiotocography (CTG) machines and one state-of-the-art ultrasound machine to Victoria Jubilee Hospital on Monday June 15, 2026. The items, valued at $32 million were donated by the Church of Jesus Christ of Latter-Day Saints and Food For the Poor Jamaica. Sharing in the occasion (from left) are Elder Paul Sutherland;, Missionary for Church of Jesus Christ of Latter-Day Saints; Mrs. Jean Lowrie-Chin, Board Director, Food For the Poor Jamaica; Dr. Garth McDonald, Senior Medical Officer, Victoria Jubilee Hospital; Mrs. Elise Fairweather-Blackwood; Deputy Director of Nursing Services, Victoria Jubilee Hospital; Mrs. Denise Cagley-Jefferson, Executive Director of Food For The Poor (FFTP) Jamaica and Elder Ahmad Corbitt Caribbean Area Presidency at the Church of Jesus Christ of Latter-Day Saints.

Victoria Jubilee Hospital (VJH) has strengthened its capacity to care for mothers and newborns with the donation of 13 Cardiotocography (CTG) machines and a state-of-the-art ultrasound machine, valued at JA$32 million.

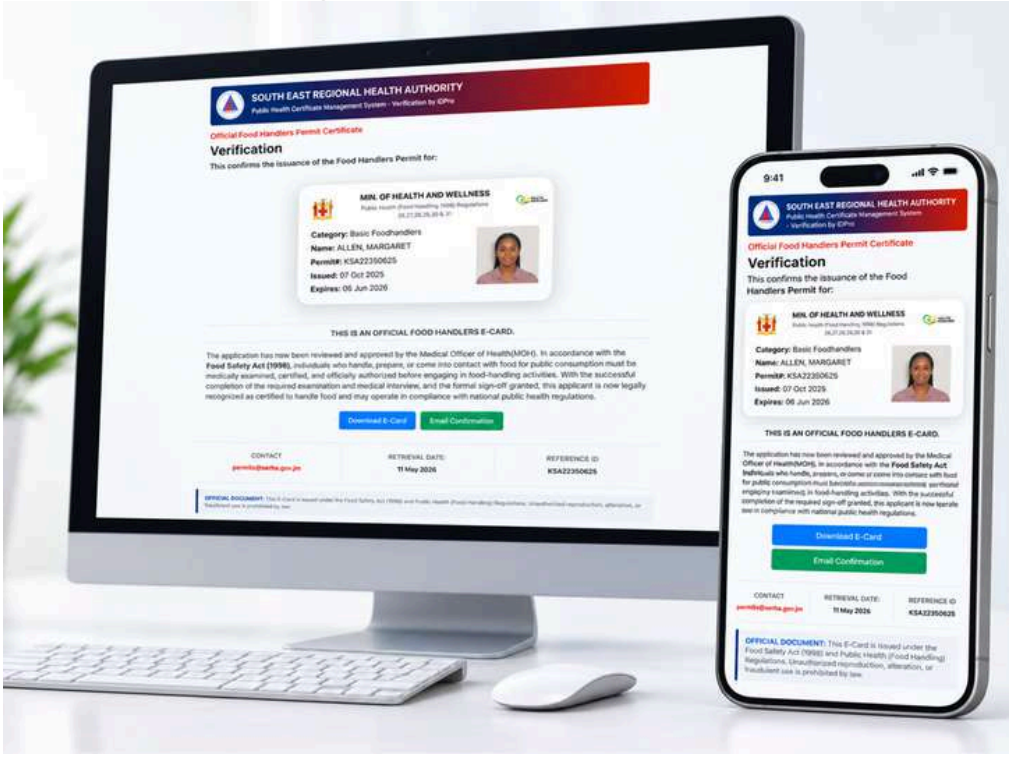

The equipment was handed over on June 15, 2026, through a partnership between Food For the Poor Jamaica and the Church of Jesus Christ of Latter-day Saints. The CTG machines will allow healthcare workers to closely monitor foetal heart rates and uterine contractions, while the ultrasound machine will support the early detection of complications during pregnancy.

The initiative also included training for doctors, nurses and other healthcare workers to ensure the equipment is used effectively.

The Hon. Krystal Lee, State Minister, Ministry of Health and Wellness, said the investment will provide reassurance for expectant mothers and strengthen the ability of healthcare workers to deliver timely and quality care.

The new equipment represents a significant boost to VJH's efforts to improve outcomes for mothers, babies and families across Jamaica.

Soft Launch of Digital Food Handlers Permit Certificate

On Monday, June 15, 2026, SERHA launched a new Electronic Food Handlers E-Card/E-Permit through the IDPro Identity Management System. The initiative provides applicants with faster and more convenient access to their permits through a fully digital process, eliminating the need to visit health departments to collect printed Food Handlers' Permit cards.

This system is the first of its kind to be implemented across the Regional Health Authorities. Designed by SERHA's ICT Department based on a recommendation from the Internal Audit Department, its introduction marks a strategic shift from traditional physical cards to digital e-cards. This transition is projected to bring an estimated J$16.8 million in savings to the Region.

Under the upgraded process, applicants across Kingston and St. Andrew, St. Catherine, and St. Thomas whose permits have been approved by the Medical Officer of Health (MOH) will have immediate access to their electronic permits. Persons will be able to view their Food Handlers E-Card/E-Permit, download a PDF copy of the permit, and save the permit to their mobile device for future reference.

Members of the public are encouraged to provide a valid email address when submitting applications to facilitate the seamless delivery of their electronic permits. Applicants who provided an email address during the application process will receive their electronic permit directly in their inbox. Applicants who did not provide an email address can still access and download a PDF copy of their permit by visiting the SERHA Permit Verification Portal (https://phcms.serha.gov.jm/verify-permit/home) and entering their First Name, Last Name, Date of Birth, Permit Number, or Application Number to verify their information. The Permit Number and Application Number can be found on the receipt issued upon payment for the permit.

SERHA remains committed to modernizing its services through innovative technology solutions that improve efficiency, accessibility, and customer satisfaction.

Spanish Town Hospital Urology Services Marks Five Years with New Equipment Donation

Dr. Elon Thompson (second right), Head of the Urology Department at Spanish Town Hospital (STH), celebrates the handover of medical equipment, including an ultrasound machine, which he donated to the institution, on June 16, 2026. Others pictured (from left) are Mr. Abdon Campbell, Parish Manager, St Catherine Health Services; Mr. Everton Anderson, Chief Executive Officer of the National Health Fund (NHF); Dr. Jacqueline Wright-James, Senior Medical Officer, STH and Ms. Jacqueline Ellis, Chief Executive Officer, STH.

The Spanish Town Hospital strengthened its ability to diagnose and care for patients with the addition of three pieces of medical equipment, handed over on June 16, 2026.

The equipment includes an ultrasound machine donated by Dr. Elon Thompson, Head of Urology Department, STH and a prostate biopsy donated by IRAD Medical Suppliers, and a Sequential Compression Device (SCD) donated by Sunrise Medical Limited.

The ultrasound machine and biopsy equipment will enhance the hospital's ability to detect and diagnose prostate cancer earlier, allowing patients to receive treatment sooner. Dr. Thompson noted that the ultrasound machine fills a key gap in the Urology Department's services and will help to reduce delays in diagnosis.

The SCD will support patient safety by improving blood circulation and helping to prevent deep-vein thrombosis (DVT), particularly among patients with limited mobility.

Dr. Jacqueline Wright-James, Senior Medical Officer, STH, commended Dr. Thompson for his fifth years of service, clinical excellence and dedication to strengthening the hospital's urology services.

With the new equipment, the hospital is better positioned to provide timely diagnosis, treatment and safer care for its patients.

Spanish Town Hospital's Blood Drive

SERHA's call for Jamaicans to give blood was met with a strong response, as the Spanish Town Hospital's blood donation drive on June 20, 2026, successfully met its target.

The blood drive was held in support of World Blood Donor Day and encouraged members of the public to donate blood to help replenish supplies and support patients in need.

Dr. Jacqueline Wright-James, Senior Medical Officer at Spanish Town Hospital, continues to emphasize the importance of regular voluntary blood donation, noting that donated blood can make a critical difference for patients undergoing surgery, persons injured in emergencies, mothers experiencing complications during childbirth and others requiring life-saving care.

The successful drive reflects the power of community support in strengthening the health system. Every donor made a meaningful contribution towards ensuring that blood is available when patients need it most.

MOHW Launches Accountability Framework to Strengthen Oversight Across Health Sector

Dr. the Hon. Christopher Tufton (second right), Minister of Health & Wellness, shakes hand while handing over the signed Memorandum of Understanding for the Accountability Framework to Mr. Lascelles Brown (second left), Regional Director, SERHA, during the function on June 19, 2026 at AC Marriot Hotel. Sharing in the occasion (from left) are Major (Ret'd) Dr. Susan Wright, Acting Regional Technical Director, SERHA and Mr. Errol C. Greene, Permanent Secretary, Ministry of Health & Wellness.

On June 19, 2026, the Ministry of Health and Wellness signed a Memorandum of Understanding (MOU) for the Accountability Framework with Jamaica's four Regional Health Authorities (RHAs) and other public health-sector bodies.

The framework focuses on strengthening accountability in three key areas: governance and oversight, financial and procurement accountability, and capacity and performance management.

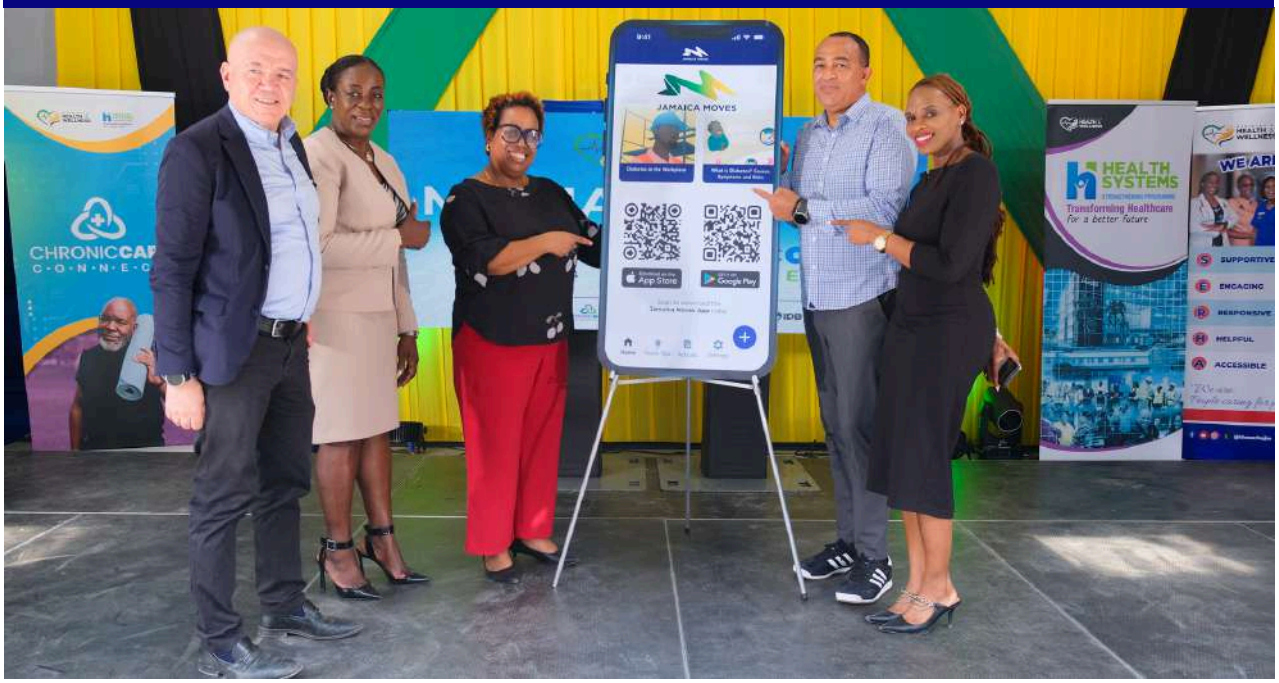

Speaking at the signing ceremony at the AC Marriott Hotel, Dr. the Hon. Christopher Tufton, Minister of Health and Wellness, challenged health-sector leaders to improve performance and ensure that Government's significant investment in public health translates into better patient experiences.

Dr. Tufton highlighted concerns including poor customer service, delayed clinics, unclean facilities and repeated appointment rescheduling, noting that these issues can undermine public confidence. "*Public health does not have a resource problem. We have a management problem and a leadership problem,*" he stated.

The Minister emphasized that the framework is not intended to punish workers, but to strengthen organizational culture, improve leadership and restore public confidence. He also called for greater attention to staff welfare, including wellness programmes and improved facilities for healthcare workers.

Over the next 12 to 18 months, the Accountability Framework will focus on improving service delivery, leadership and accountability across Jamaica's public health system.

Launch of Chronic Care Connect and Jamaica Moves App

The Ministry of Health and Wellness launched two technology-driven initiatives such as Chronic Care Connect (CCC) and Jamaica Moves App on June 24, 2026, aimed at strengthening the management of Non-Communicable Diseases (NCDs) and empowering Jamaicans to take greater responsibility for their health.

Launched by Dr. the Hon. Christopher Tufton, Minister of Health and Wellness at the Social Development Commission (SDC) Complex in Spanish Town, the initiatives are the Chronic Care Connect (CCC) pilot and the Jamaica Moves mobile application.

The one-year CCC pilot will involve approximately 600 volunteer patients across six health centres, providing a more proactive and patient-centred approach to managing conditions such as diabetes and hypertension. Participants will receive additional support in areas including exercise, nutrition, footcare and health technology, while benefiting from more streamlined clinic visits.

The Jamaica Moves app enables users to track physical activity and monitor key health indicators, including blood pressure, blood sugar and weight, using their smartphones.

The initiatives form part of the Health Systems Strengthening Programme (HSSP), supported by the European Union (EU) and Inter-American Development Bank (IDB). The programme seeks to modernise healthcare through technology, improve patient engagement and monitoring, and ultimately reduce the impact of NCDs on individuals, families and the health system.

SERHA Invests JA$44Million in New Fleet of Vehicles

Staff members of the Transport Department share a light moment while posing in front of the new panel vans.

SERHA has expanded its operational capacity with the acquisition of five new fleet vehicles valued at some J$44 million, aimed at strengthening support services across its health network.

The investment, totalling J$44,019,968.80, includes one (1) retrofitted wheelchair- accessible coaster bus and four (4) panel vans. The coaster bus was acquired at a cost of J$17,816,964.40, while each panel van cost J$6,550,751.10. The vehicles have been assigned to targeted areas within the region to address specific service needs:

- Liguanea Region: One retrofitted wheelchair-accessible coaster bus assigned to the Sir John Golding Rehabilitation Centre (SGJRC) to support patient transport, particularly for persons requiring wheelchair access. One panel van to support Dietary Services operations.
- St. Joseph's Hospital: One panel van allocated to strengthen day-to-day operational activities and internal logistics.
- Regional Transport Department: Two panel vans designated for system-wide support, including laundry transportation and other essential logistical functions across SERHA facilities.

This expansion is expected to improve coordination of non-clinical services such as patient transport, dietary delivery, and laundry distribution, contributing to smoother facility operations across the region.

The initiative forms part of SERHA's broader strategy to modernise infrastructure and improve the reliability of essential support systems within the public health sector.

Family Care Giver Programme Expands to Spanish Town Hospital

At Spanish Town Hospital, families are being given a more active role in supporting their loved ones during hospitalisation through the Family Caregivers Programme, which was introduced at the facility on July 15, 2026.

The initiative is part of a standardized national framework of the Ministry of Health & Wellness designed to make patients more comfortable, improve their experience in hospital and strengthen the partnership between healthcare workers and families.

Under this programme, patients can identify a family member or close friend to serve as their designated caregiver. These caregivers provide non-clinical support, including feeding, comfort and emotional encouragement, while doctors, nurses and other licensed healthcare professionals continue to manage all medical treatment.

Dr. the Hon. Christopher Tufton, Minister of Health and Wellness, described the programme as a "game changer" in the administration of healthcare, emphasising that families have an important role to play in a patient's recovery. "*Health is everybody's business and the administration of health is everybody's business, not just the victim of illness the patient, not just the doctors and nurses of the hospital but family members must be part of the therapy,*" he said.

Spanish Town Hospital is the second facility to implement the programme and the first to extend it to adult patients. The initiative was first launched at the Bustamante Hospital for Children on January 19, 2026.

Since its launch at the children's hospital, 1,053 caregivers have enrolled, providing care and psychosocial support to more than 737 young patients. Dr. Tufton said the experience has been rewarding for patients, families, clinicians and hospital management, noting that the programme has helped to bring everyone together in supporting patients through their recovery.

The Family Caregivers Programme is expected to be implemented across public hospitals operated by Jamaica's Regional Health Authorities, creating a more structured and supportive approach to family involvement in patient care.

At its heart, the programme recognizes a simple but powerful idea: healing is not only about medicine it is also about having someone you trust by your side.

Kudos to SERHA's NCD and Injury Prevention Unit

Congratulations

Non-Communicable Disease and Injury Prevention Unit at SERHA

The Board and Management of SERHA congratulate the Unit on this remarkable achievement and recognition by the Ministry of Health and Wellness for excellence in the performance of the Non-Communicable Diseases Programme.

Individual Staff Awards for Excellence

- Medical Officer (Health) Award for Excellence – Dr. Kimberly Myers-Barnes
- Registered Nurse of the Year Award for Excellence – Ms. Kamala Clarke
- NCD Programme Officer of the Year Award for Excellence – Mrs. Yanique Lipman

Regional Awards

- Regional Excellence in Diabetes Control Award – SERHA
- Regional Excellence in Hypertension Control Award – SERHA

Parish Award

- Regional Excellence in Diabetes Control Award – SERHA

Highlights of KPH's Health Fair

The Kingston Public Hospital (KPH) hosted its Health and Wellness Fair on Thursday, July 30, 2026, at Saint William Grant Park in Downtown Kingston, as part of its year-long activities commemorating its 250th anniversary under the theme, "250 Years of Healing Jamaica."

Members of the public benefited from free health checks and services, including; Blood pressure checks, Body Mass Index (BMI) assessments, Blood glucose tests, Blood cholesterol tests, Vision tests and other health screenings and health education services.

Healthcare professionals and partners also offered services, including Know Your Numbers screenings, medical consultations, BMI assessments, physiotherapy, dietary advice, and renal and eye care.

Mr. Dwayne Francis, Acting Chief Executive Officer, KPH, said that the event was part of the hospital's effort to give back to the people of downtown Kingston and the wider country.

Dr. the Hon. Christopher Tufton, Minister of Health & Wellness, commended KPH's contribution to healthcare and praised its staff for their continued commitment to patient care. The Minister also noted that plans are advancing for the construction of a new Kingston Public Hospital, marking the beginning of a new chapter for the historic institution. See pictorial highlights below:

Infrastructural Progress Report on Health Facilities in St. Catherine

SPANISH TOWN HOSPITAL

Spanish Town Hospital's new six-storey wing has reached its maximum height, with the project 45% complete as of August 17, 2026. The J$5.5-billion redevelopment will expand Accident & Emergency services and add operating theatres, an Intensive Care Unit (ICU), and advanced diagnostic services, including CT scans and MRI. Bed capacity will also increase by approximately 100 beds. The project remains on track for completion in early 2027.

ST. JAGO COMPREHENSIVE HEALTH CENTRE

TThe St. Jago Park Comprehensive Health Centre is 84% complete. The J$704-million project will expand the facility and enhance its laboratory services.

OLD HARBOUR COMPREHENSIVE HEALTH CENTRE

The new Old Harbour Comprehensive Health Centre is 95% complete and is expected to begin phased operations in the final quarter of 2026. The nearly J$1-billion, 2,000-square-metre facility will serve up to 10,000 patients monthly. New services will include X-ray, ECG, physiotherapy, ultrasound, expanded laboratory testing for chronic illnesses, audiometry, and expanded dental services.

PORTMORE COMPREHENSIVE HEALTH CENTRE

TThe Greater Portmore Comprehensive Health Centre is 97% complete, with its J$660-million expansion set to provide enhanced services, including X-ray, ECG, physiotherapy, ultrasound, and expanded laboratory testing for chronic illnesses.

Jamaica Energy Partners Hands Over JA$4.7 Million Cheque to Bustamante Hospital for Children

On July 18, 2026, nearly 500 participants supported the sixth staging of the Jamaica Energy Partners (JEP) Group's RAYZ for Life 5K, raising $5.1 million for the Oncology Department at the Bustamante Hospital for Children (BHC).

Held at Norbrook Loop under the theme "Finishing What We Started," the event surpassed its initial $3-million target, following an initial donation of $4.7 million, with support from 30 sponsors, participants and donors.

The funds will help the Oncology Department at BHC acquire essential equipment to support the care of children diagnosed with cancer. Mr. Anthony Wood, Chief Executive Officer of BHC, expressed gratitude to JEP and everyone who contributed. He stated that "*this contribution will support the Oncology Department by providing essential equipment to help care for children diagnosed with cancer. We are truly grateful to Jamaica Energy Partners Group and everyone who made this possible.*"

Dr. Wayne McKenzie, JEP Group President and CEO, said the organization remains committed to supporting Bustamante Hospital for Children and the patients it serves.

Five New Swing Machines for Vector Control Team in St. Thomas

The Vector Control Team at the St. Thomas Health Department is better equipped to protect communities from mosquito-borne diseases following the acquisition of five new swing foggers, valued at more than $3 million that was delivered on August 5, 2026.

The new equipment will strengthen mosquito control activities across the parish, supporting ongoing efforts to reduce mosquito breeding and prevent the spread of vector-borne diseases.

The investment is another step towards improving the team's capacity to respond to mosquito threats and keep communities in St. Thomas safer and healthier.

World Mosquito Day Highlights

The Vector Control Unit of the Kingston and St. Andrew Health Department intensified its call for Jamaicans to take action against mosquitoes and hosted its World Mosquito Day Expo on Thursday, August 20, 2026, at Nelson Mandela Park in Half Way Tree. Held under the theme, "Taking Action Together: Building Mosquito-Resilient Communities," the expo brought health education and services directly to the public while highlighting the critical role communities play in reducing mosquito breeding and protecting public health.

Members of the public benefited from free health checks, including blood pressure, blood sugar, blood cholesterol and body mass index (BMI) assessments, as well as HIV testing. Participants also benefited from educational sessions focused on mosquito prevention and control. Below are pictorial highlights:

Mr. Lascelles Brown
Regional Director–SERHA

"As Nurses' Week 2026 draws to a close, I extend my deepest gratitude and admiration to every nurse serving across the Southeast Regional Health Authority (SERHA). Throughout this week, we have celebrated your extraordinary contribution to healthcare, and today we pause to simply say thank you once again.

Read More

SERHA
South East Regional Health Authority

Celebrating Nurses' Week

On behalf of the SERHA Board, our Executive Management Team, and in partnership with the Honourable Dr. Christopher Tufton, Minister of Health and Wellness, thank you for your unwavering dedication to the health and well-being of the people of Jamaica. Your professionalism, compassion and commitment exemplify the very best of public service.

For generations, nurses have been both the heart and backbone of our healthcare system. Through every challenge, every emergency and every moment of uncertainty, you have remained steadfast in your commitment to healing, comforting and serving others. Your resilience, expertise and humanity continue to strengthen our health system and inspire confidence in the communities we serve.

As SERHA advances its transformation agenda through stronger primary and secondary healthcare services, the development of new comprehensive health centres, and a renewed focus on quality, innovation and patient-centred care, your leadership remains indispensable. Infrastructure may create opportunity, but it is your knowledge, compassion and excellence that transform healthcare into hope and healing.

This year's global theme, ***Our Nurses. Our Future. Empowered Nurses Save Lives***", reminds us that investing in and supporting our nurses is fundamental to building a stronger, more resilient Jamaica. As an organization, we remain committed to fostering an environment where nurses are valued, empowered and equipped to thrive.

As this commemorative week comes to an end, I leave you with this charge: continue to lead with compassion, embrace innovation, mentor those who follow, and never lose sight of the profound difference you make every day. You are not only caregivers—you are leaders, advocates, educators and partners in shaping the future of healthcare.

Thank you for making this exceptional Nurses' Week through your continued service, professionalism and dedication. Your legacy is reflected in every life you touch and every community you strengthen. Happy Nurses' Week, and may you continue to serve with excellence as together we build a healthier, stronger Jamaica.

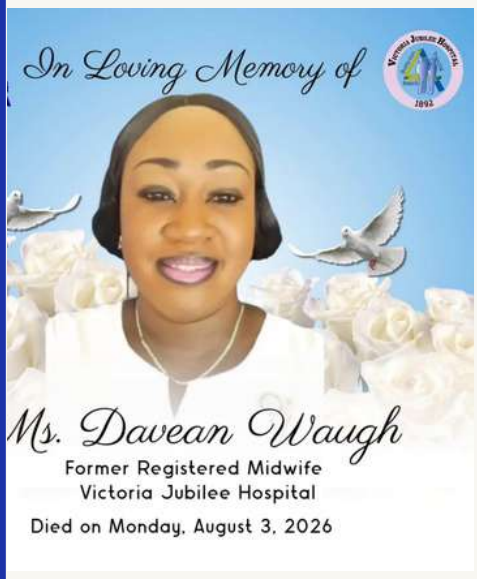

Thank you for all that you do!
